

SVHC declaration / PFOS statement

Schaffner EMV declares that our product portfolio we provide to the market is compliant to restrictions on substances affected by REACH (see table 1 and table 1. ff). Schaffner will ensure that suppliers of Schaffner will pre-register/register for which REACH registration requirements are applicable. Perfluorooctane sulfonates (PFOS) are persistent, bio-accumulating and toxic to mammalian species. They are used, for example, in coatings, carpets, photo resists, hydraulic fluids and glass fabric for PCBs. They normally take the form of sodium or potassium salt. Schaffner does not add or use PFOS during the manufacturing process and all our raw material are required to be free of PFOS. To our knowledge, the products that we supply to you do not contain any substances at concentration which are prohibited under the legislation relevant to those products.
