FN3271H description

- FN3271H can be used for applications where a differential mode choke is needed on the load side.
- In general FN3271H is a mirrored version of the high current FN3270H (>100A).
- PE is not mirrored and is still available on line side, due to safety measures.
- In 50/50 Ohm measurement for insertion loss no difference can be detected.
