# General Purpose Power Entry Module with Switch

- Rated currents up to 10 A
- High quality 2-pole rocker switch
- Optional reduced leakage current versions (A/B type)
- Complies with IEC/EN 60601-1
- Snap-in versions (S type)
- Good attenuation performance

## Performance indicators

* Value in () relates to the inductive current charge: cosφ = 0.65

## Approvals

- UL®, cUL®, CE, RoHS

## Features and benefits

- Excellent conducted attenuation performance, based on chokes with high saturation resistance and good thermal behavior
- High quality 2-pole rocker switch for all-pole disconnection
- Faston terminals for easy assembly
- FN 9264 B versions comply with the requirements of 1MOP acc. to IEC/EN 60601-1 for creepage and clearance, leakage current and high potential testing
- As flange mount and snap-in types available

## Typical applications

- Portable electrical and electronic equipment
- EDP and office equipment
- Single-phase power supplies
- Switch-mode power supplies
- Test and measurement equipment
- Medical electrical devices (MD) and In-Vitro Diagnostic (IVD) medical devices

* Leakage current under normal operating conditions (acc. to IEC60939-3). Note: if the neutral line is interrupted, worst case leakage could reach twice this level.

** Tolerances apply: Inductance: -30/+50%, Capacitance: ±20%, Resistance: ±10%

### Product selector

- **Blank**: Snap-in panel thickness range 1.0 to 2.5 mm
- **30**: Snap-in panel thickness range >2.5 to 3.5 mm
- **06**: Faston 6.3 x 0.8mm (spade/soldering)
- **1 to 10**: Rated current
- **Blank**: Standard version
- **B**: Medical version (without Y2-capacitor, leakage current max 2µA*)
- **Blank**: Standard housing with mounting flanges
- **S**: Snap-in version, snapper on vertical side

For example: FN 9264-1-06, FN 9264 B-6-06, FN 9264 SB-4-06-30

Accessories for IEC Inlet Filters and Power Entry Modules

The accessories displayed are a selection of available accessories for IEC Inlet filters and IEC Power entry modules. As they are displayed in a general way there might be variants of the filters where the accessories are not available.

For further information please ask your local Schaffner Sales Partner and visit our homepage: https://www.schaffner.com/

Power Cord with Locking System for Inlet Filters IL 13, IL 13 P, IL 19

The locking system has a tensile force of typical 200N. It is recommended to use it with flange mount filters.

Link to Datasheet: Datasheet IEC C13/ C19 locking cable

IEC C13 Rewireable Connector for individual Power Cord with Locking System

The locking system has a tensile force of typical 300N. It is recommended to use it with flange mount filters. For details refer to our Application Note “Using IEC Lock Power Cords with IEC Inlets and Filters” Schaffner power connector with IEC lock guard against accidental disconnection of all electrical appliances with an IEC inlet. No exchange or modification of the IEC inlet or IEC inlet filter system is needed. Easy retrofit for all electronic equipments and devices.

Link to Datasheet: Datasheet IEC C13 rewirable

IB - Insulating Boots

There is a full range of insulating boots available from Schaffner that provide a physical cover for the exposed terminals on the back of IEC Inlet Filters. These boots fit the simplest non-fused and unswitched style up to the fully fused and switched IEC filtered inlet. The boots are made from a durable black PVC material that conforms to UL94-V0 flammability requirements. The boots slip easily over the back of the filter and reduce the risk of electrical shock to maintenance personnel whilst protecting the filter from environmental hazard such as the ingress of dust and moisture.
