Failure analysis 30A/50A 3-Wire

1. Intended use

The Ecosine® active harmonic filter is used for active compensation of reactive power and harmonic content and for load balancing. Please ensure that no compensation systems, which are not detuned, are connected to the same grid. Otherwise interactions between Ecosine® active and these compensation systems may occur.

---

**Dangerous voltage**
Risk of death due to short circuits and electric shock if the active filter is opened improperly. The discharge time of the intermediate circuit after disconnecting from the mains can be more than 5 minutes. All interventions involving opening the device cover or removing or installing the connection cable may only be performed by qualified personnel.

---

**High-frequency interferences**
In a residential environment, high-frequency interferences could occur, which necessitate interference suppression.

---

**Note**
Please note that there are additional manuals for some product variants. For the latest versions of these manuals go to www.schaffner.com. It particularly applies to types FN3420-100/120-400-3-GL, please observe the special EMC-Filter Manual for these types (Ecosine EMC Filters for Applications with GL).

---

2. Personnel qualification

Installation of the Ecosine® active filter, inspections for proper operation, and certain troubleshooting measures may only be performed by qualified personnel. All other measures may be performed by people who have read these instructions.

**Attention!**
Before starting to work on the device, ensure that it is disconnected from the grid and capacitors are discharged

3. Tool list (minimum requirements)

- Camera
- Multimeter with diode tester
- Screwdriver PH2
- AHF viewer software
4. General condition

Take a picture of the label to get the device datas.

- Label

Take a picture of the Front cover including near surroundings, check the basic condition outside.

- Front Cover
- Near surrounding
- Basic condition outside

Remove cover of the main connectors
Remove the front cover

Take a picture from the main fan side

☐ Main Fan

Take a picture from the enclosure fan side

☐ Enclosure Fan
5. Application & Installation

Check and indicate how the device is connected. Specify the type & values of the load & external fuses or forward a schematic diagram.

Load: ______________________________

Load Values: _______________________

External fuses: _____________________
Specify the type and value of the used current transformer

CT Brand: _____________________

CT Value: _____________________

Mains/Load side installed: Mains □ Load □

Specify the environmental conditions: Ambient temperature in °C & humidity. Also indicate device temperature during operation

Ambient temperature: _____ °C

Device temperature: _______ °C

Humidity: _______%RH

Specify the exact information shown in the display. Status or error message, if it's possible

Error message: ______________________

Status message: _____________________
Parameters and event log of all affected devices are required. These can be downloaded via AHF Viewer, if possible.

Parameter File: Yes ☐ No ☐
Event Log: Yes ☐ No ☐

Any other Schaffner filters are installed in same application:
Type & Qty:_______________________
No:           
Any other problems detected on these other filters, same/other problems happen in the past:
__________________________________

6. Measurements on device

Check with ohmmeter the resistance between
L1 and L2:_______Ω  
L2 and L3:_______Ω  
L1 and L3:_______Ω
Check with ohmmeter resistance between
L1 and connecting bolt 1
L2 and connecting bolt 2
L3 and connecting bolt 3

Remove Control Box

Loose insulation foil
Check with:

+ of diode tester on + connection of capacitor board and - of diode tester on bolt L1 / L2 / L3
+ of diode tester on - connection of capacitor paket and - of diode tester on bolt L1 / L2 / L3
- of diode tester on + connection of capacitor paket and + of diode tester on bolt L1 / L2 / L3
- of diode tester on - connection of capacitor paket and + of diode tester on bolt L1 / L2 / L3

Enter the measured values to the table below.

| + multimeter / - Caps | - multimeter / bolt L1 | 1. _______Vdc |
| + multimeter / - Caps | - multimeter / bolt L2 | 2. _______Vdc |
| + multimeter / - Caps | - multimeter / bolt L3 | 3. _______Vdc |
| - multimeter / + Caps | + multimeter / bolt L1 | 1. _______Vdc |
| - multimeter / + Caps | + multimeter / bolt L2 | 2. _______Vdc |
| - multimeter / + Caps | + multimeter / bolt L3 | 3. _______Vdc |

Send the pictures, all requested information, the event log and the parameter setting to Schaffner Service Center, for final analysis and define of next steps.
