

# Ecosine Max, 480 VAC 60 Hz Full Performance Passive Harmonic Filters

- Demonstrate best cost-performance ratio
- Achieve 5% THDi for diode rectifier without
- DC-link choke and thyristor rectifier
- Best-in-class partial load performanceMost compact open panel design for cabinet
- integration
- Reliable and robust
- Plug and play, ready to use

#### **Technical Specifications**

| Nominal operating voltage                 | 3x440 VAC to 480 VAC ±10%  |
|---|--|
| Overload capability                       | 1.6x rated current for 1 minute, once per hour   |
| Operating frequency                       | 60 Hz ±1 Hz  |
| Total harmonic current distortion THDi*   | <5% @ rated power for drives without Ldc<br>~3.5% @ rated power for drives equipped with 4% Ldc                  |
| Total demand distortion TDD               | According to IEEE 519  |
| Nominal motor drive input power rating    | 350 to 600 HP  |
| High potential test voltage               | P -> E 2520 VAC (1s)   |
| Earthing system                           | TN, TT, IT   |
| Efficiency                                | >99% for rated voltage and power   |
| Overvoltage category                      | OV III (IEC 60664-1)   |
| Temperature range (operation and storage) | −25°C to +40°C fully operational<br>+40°C to +70°C derated operation****<br>−25°C to +85°C transport and storage |
| Cooling                                   | External cooling***  |
| Protection category                       | IP 00  |
| Flammability corresponding to             | UL 94 V-2  |
| Design corresponding to                   | Filter: UL 61800-5-1, EN 61800-5-1<br>Chokes: EN 60076-6   |
| SCCR**                                    | 100 kA (UL approved)   |
| MTBF (Mil-HB-217F)                        | >200,000 h @ 40°C/480 V  |
|   |  |

\* System requirements: THDv <2%, line voltage unbalance <1%

Note: performance specifications in this brochure refer to six-pulse diode rectifiers. SCR rectifier front-ends will produce different results, dependent upon the firing angle of the thyristors.

\*\* External UL-rated fuses required. Please consult the user manual.

\*\*\* Please check the inlet air flow required for cooling table further in this document and the user manual.

\*\*\*\* Iderated = Inominal\*SQRT((Tmax-Tamb)/(Tmax-Tnominal)) = Inominal\*SQRT((70°C-Tamb)/30°C)

#### **Features and Benefits**

Schaffner ecosine harmonic filters represent an economical solution to the challenge of loadapplied harmonics mitigation in three-phase power systems. With a plug-and-play approach and more compact dimensions than comparable products, they can be quickly installed and easily commissioned. They increase the reliability and service life of electric installations, help utilize electric sytem capacity better, and are the key to meet Power Quality standards such as IEEE 519. Ecosine filters reshape your distorted current back to the desired sinusoidal waveform. Schaffner ecosine filters can be applied to virtually any kind of power electronics with front-end six-pulse rectifiers, 3-phase diode or thyristor bridges, where harmonic current distortion needs to be reduced to defined limits.

#### **Typical Applications**

- Equipment with front-end six-pulse rectifier
- Motor drives
- Factory automation equipment
- Water/wastewater treatment facilities
- Fan and pump applications
- HVAC installations
- Mission-critical processes
- DC fast chargers

Typical electrical schematic
