High-end Line Filter for Machinery/Equipment

- Now available up to 600 A
- Compact, space-saving design, optimized for industrial machinery
- Combines exceptional attenuation with low leakage current
- Suitable for machines in mixed/domestic environments (Class A/B)
- Increases also the immunity if operated directly on the mains input

**Features and benefits**

- A compact and light weight filter design with a „cubic“ shape, requiring minimum mounting space and thus taking the constructional conditions on the mains input of machinery into account
- Simple and time-saving installation with good accessibility for automatic and hand tools
- Solid, touch-safe terminal blocks (8 to 200 A types) offering sufficient contacting cross section according to the EN 60204-1 installation standard, which is very common in industrial applications
- As a mains input filter for three phases and neutral line, FN 3280 provides enough performance to ensure EMC compliance of machinery in mixed (Class A) or even domestic (Class B) environments. Further, its use will also increase the immunity of the entire installation significantly
- FN 3280 provides the attenuation performance needed to meet the requirements of various machine tools with up to 12 driving axes and ~10 to 20 m of motor cable each
- For easy selection and application, the filter current ratings are aligned with common fuse values

**Technical specifications**

- **Maximum continuous operating voltage**: 3x 520/300 VAC (480 VAC + 10% possible)
- **Operating frequency**: DC to 60 Hz
- **Rated currents**: 8 to 600 A @ 50°C
- **High potential test voltage**
  - P/N –> E 2750 VDC for 2 sec
  - P –> P 2250 VDC for 2 sec
  - P -> N 1300 VDC for 2 sec
- **Protection category**
  - IP 20 (8 to 200 A types)
  - IP 00 (300 to 600 A types)
- **Overload capability**
  - 4x rated current at switch on,
  - 1.5x rated current for 1 minute, once per hour
- **Temperature range (operation and storage)**
  - -25°C to +100°C (25/100/21)
- **Flammability corresponding to**
  - UL 94 V-2 or better
- **Design corresponding to**
  - UL 1283, CSA 22.2 No. B. 1986, IEC/EN 60939
  - >360,000 hours

**Approvals**

- **Typical applications**

  Mainly industrial equipment, machinery, machine tools and diverse process automation systems with three-phase and neutral electricity supply. Due to the outstanding attenuation performance, FN 3280 is also the first choice for noisy power supplies, renewable energy applications, highpower office equipment and further three-phase and neutral devices. Because of the relatively low leakage current, FN 3280 may even be used for some medical devices.
