### Compact power line AC EMC/EMI filter

- High current 3-phase filter up to 2300 A
- Extremely compact and lightweight design
- Minimum installation footprint
- Performance optimised for standard purpose applications
- FN 3310 series without Cy capacitors to ground
- FN 3311 IT versions for use in IT power networks

#### Technical specifications

<table>
<thead>
<tr>
<th>Specification</th>
<th>Specification Value</th>
</tr>
</thead>
</table>
| Maximum continuous operating voltage | 3x 520/300 VAC for FN 3311  
3x 520 VAC for FN 3310 |
| Operating frequency            | DC to 60 Hz |
| Rated currents                 | 250 to 2300 A @ 50°C |
| High potential test voltage    | P -> E 2 kVAC for 2 sec (FN 3311 IT 3 kVAC for 2 sec)  
P -> P 2.25 kVDC for 2 sec (FN 3311 IT 2.68 kVDC for 2 sec) |
| Protection category            | IP 00 |
| Overload capability            | 4x rated current at switch on, max. 8 sec  
1.5x rated current for 1 minute, once per hour |
| Temperature range (operation and storage) | -40°C to +100°C |
| Climatic category              | 40/100/21 acc. to IEC 60068-1 |
| Terminals/Housing              | Ni plated cu bars/Metal |
| Flammability corresponding to  | UL 94V-0 |
| Design corresponding to        | UL 1283, CSA 22.2 No. 8, IEC/EN 60939, EN 60721-3 |

#### Approvals

The FN 3311/FN 3310 product series of standard EMC/EMI filters are based on Schaffner’s many years of expertise in filter design for all types of converter and inverter applications. Installed between the PV inverter and the power grid, the FN 3311/FN 3310 AC filters are used to influence positively the conducted emissions on the grid side to help to comply with the required emission standards.

#### Features and benefits

The FN 3311/FN 3310 series are the most compact dedicated high current AC filters, not only suitable for PV applications, but being an optimum fit with most modern PV inverter topologies. In addition the filters can be configured in a very flexible way to fulfill custom specific application requirements. All FN 3311/FN 3310 come in unsymmetrical housings, which help to prevent inverse installation and wrong electrical connection. Along with solar panel-side installed Schaffner DC EMC/EMI filters FN 2211/FN 2210, the AC filters FN 3311/FN 3310 are key to meet the stringent international standards for electromagnetic compatibility and help to ensure a reliable and fault-free operation of the entire PV system.

#### Typical applications

The FN 3311/FN 3310 series are primarily designed for all kind of power line connected converter and inverter applications between 250 and 2300 A. However, they are optimised for PV inverter and can potentially also be applied for general purpose motor drives applications.
