Compact power line AC EMC/EMI filter

- High current 3-phase filter up to 2300 A
- Extremely compact and light weight design
- Minimum installation foot print
- Performance optimised for standard purpose applications
- FN3310 series without Cy capacitors to ground
- FN3311 IT versions for use in IT power networks

Features and benefits

The FN 3311/FN 3310 series are the most compact dedicated high current AC filters, not only suitable for PV applications, but being an optimum fit with most modern PV inverter topologies. In addition the filters can be configured in a very flexible way to fulfill custom specific application requirements. All FN 3311/FN 3310 come in unsymmetrical housings, which help to prevent inverse installation and wrong electrical connection. Along with solar panel-side installed Schaffner DC EMC/EMI filters FN 2211/FN 2210, the AC filters FN 3311/FN 3310 are key to meet the stringent international standards for electromagnetic compatibility and help to ensure a reliable and fault-free operation of the entire PV system.

Typical applications

The FN 3311/FN 3310 series are primarily designed for all kind of power line connected converter and inverter applications between 250 and 2300 A. However, they are optimised for PV inverter and can potentially also be applied for general purpose motor drives applications.

Typical electrical schematic FN 3311

- FN 3311 IT series without resistor to PE
- FN 3310 series without resistor and capacitor to PE

</table>

* Filters with higher current ratings available upon request.
** Filters with reduced Cy capacitance to ground for high asymmetrical currents and higher voltages available upon request.
*** Calculated at rated current, 480 VAC (FN 3311)/690 VAC (FN 3311 HV) and cos phi=0.8. The exact value depends upon the efficiency of the drive, the motor and the entire application.
**** Leakage current according IEC 60939-1

### Typical filter attenuation FN 3311-xxx-99-C16-R55

Per CISPR 17, A=50 Ω/50 Ω sym; B=50 Ω/50 Ω asym
