Ecosine Max, 50 Hz Passive Harmonic Filters

- Demonstrate best cost-performance ratio
- Achieve 5% THDi for diode rectifier without DC-link choke and thyristor rectifier
- Best-in-class partial load performance
- Most compact open panel design for cabinet integration
- Reliable and robust
- Plug and play, ready to use

**Technical specifications**

- **Nominal operating voltage**: 3 x 380 VAC to 415 VAC ±10%
- **Operating frequency**: 50 Hz ±1 Hz
- **Nominal motor drive input power rating**: 250 to 500 kW
- **Total harmonic current distortion THID**: <5% @ rated power for drives without Ldc
  ~3.5% @ rated power for drives equipped with 4% Ldc integration
- **Efficiency**: >99% for rated voltage and power
- **High potential test voltage**: P -> E 2520 VAC (1s)
- **Protection category**: IP 00
- **Cooling**: External cooling
- **Overload capability**: 1.6x rated current for 1 minute, once per hour
- **Ambient temperature range**: -25°C to +45°C fully operational
  +45°C to +70°C derated operation
  -25°C to +85°C transport and storage
- **Flammability corresponding to**: UL 94 V-2
- **Design corresponding to MTBF @ 45°C/415 V (Mil-HB-217F)**
  >200,000 hours
- **Earthing System**: TN, IT
- **Overvoltage category**: UL 507-2

**Approvals**

- UL pending

**Features and benefits**

Schaffner ecosine harmonic filters represent an economical solution to the challenge of load-applied harmonics mitigation in three-phase power systems. With a plug-and-play approach and more compact dimensions than comparable products, they can be quickly installed and easily commissioned. They increase the reliability and service life of electric installations, help utilize electric system capacity better, and are the key to meet Power Quality standards such as IEEE 519. Ecosine filters reshape your distorted current back to the desired sinusoidal waveform. Schaffner ecosine filters can be applied to virtually any kind of power electronics with front-end six-pulse rectifiers, 3-phase diode or thyristor bridges, where harmonic current distortion needs to be reduced to defined limits.

**Typical applications**

- Equipment with front-end six-pulse rectifier
- Motor drives
- Factory automation equipment
- Water/wastewater treatment facilities
- Fan and pump applications
- HVAC installations
- Mission-critical processes
- DC fast chargers
