Ecosine max, 480 VAC 60 Hz Economy Passive Harmonic Filters

**Features and benefits**

Schaffner Ecosine harmonic filters represent an economical solution to the challenge of load-applied harmonics mitigation in three-phase power systems. With a plug-and-play approach and more compact dimensions than comparable products, they can be quickly installed and easily commissioned. They increase the reliability and service life of electric installations, help utilize electric system capacity better, and are the key to meet Power Quality standards such as IEEE 519. Ecosine filters reshape your distorted current back to the desired sinusoidal waveform. Schaffner Ecosine filters can be applied to virtually any kind of power electronics with front-end six-pulse rectifiers, 3-phase diode or thyristor bridges, where harmonic current distortion needs to be reduced to defined limits.

**Technical specifications**

- **Nominal operating voltage**: 3 x 440 VAC to 480 VAC ±10%
- **Operating frequency**: 60 Hz ±1 Hz
- **Nominal motor drive input power rating**: 350 to 600 HP
- **Total harmonic current distortion THDi***: <8% @ rated power for drives without Ldc
- **Efficiency**: >99% for rated voltage and power
- **Overload capability**: 1.6x rated current for 1 minute, once per hour
- **SCCR****: 100 kA (UL approved)
- **High potential test voltage**: P -> E 2520 VAC (1s)
- **Overvoltage category**: OV III (IEC 60664-1)
- **Earthing System**: TN, TT, IT
- **Protection category**: IP 00
- **Cooling**: External cooling***
- **Ambient temperature range**: -20°C to +40°C fully operational
- **Overvoltage category**: +40°C to +70°C derated operation****
- **Cooling**: -25°C to +85°C transport and storage
- **Design corresponding to**: Filter: UL 61800-5-1, EN 61800-5-1
- **Chokes**: EN 60076-6
- **Flammability corresponding to**: UL 94 V-0
- **MTBF @ 40°C/480 V (Mil-HB-217F)**: >200,000 hours

**Typical electrical schematic**

- L<sub>i</sub>
- L<sub>o</sub>
- L<sub>t</sub>
- TDJ/S
- C<sub>t</sub>

---

* System requirements: THDv <2%, line voltage unbalance <1%
Note performance specifications in this brochure refer to six-pulse diode rectifiers.
SCR rectifier front-ends will produce different results, dependent upon the firing angle of the thyristors.

** External UL-rated fuses required. Please consult the user manual.
*** Please check the inlet air flow required for cooling table further in this document and the user manual.
**** \( I_{derated} = I_{nominal} \sqrt{(T_{max} - T_{amb})/(T_{max} - T_{nominal})} = I_{nominal} \sqrt{(70°C - T_{amb})/30°C} \)
